

Project Title	Amount Requested	Description of Project	Recipient	Authorization
Yuba River Basin Project	\$12,000,000	An FY 2010 appropriation of \$12,000,000 will enable the Corps to complete a General Reevaluation Report (GRR) in 2010, certify advanced levee improvements constructed by the state and local interests, and start construction on one of the final elements of the project; the Marysville Ring Levee.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	P.L. 106-53, Sec. 101(a)(10)
Hamilton City, CA	\$15,000,000	A construction appropriation of any level will enable the Corps to sign a Project Cost Agreement with nonfederal sponsors, which, in turn, would allow local project participants to initiate advanced restoration and construction work. This work schedule would not only accelerate flood protection and environmental improvements, it would also generate significant cost savings to both federal and nonfederal interests.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	P.L. 110-114, Sec. 1001(8)
Sutter County, CA	\$1,972,000	An FY 2010 appropriation of \$1,972,000 will enable the Corps of Engineers to accelerate the Sutter Feasibility study and allow the state and local interests to initiate corrective actions identified by the Corps using state and local funds.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	Flood Control Act of 1962 (P.L. 87-874)
Mid-Valley Area Levee Reconstruction	\$6,000,000	An FY 2010 appropriation of \$6,000,000 will allow the Corps to develop the construction plan, establish environmental litigation and initiate levee reconstruction in conjunction with state funding.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	Flood Control Act of 1917, 1928, and 1941; Rivers and Harbors Act of 1937
Lower Cache Creek Flood Control Feasibility Study	\$300,000	An FY 2010 appropriation of \$300,000 will assist in completion of a feasibility study to determine alternatives to reduce flooding from Cache Creek within the City of Woodland and its unincorporated areas.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	Flood Control Act of 1962 (P.L. 87-874)
Sacramento River Bank Protection Project	\$20,400,000	The requested funds would be used to continue construction of various projects to preserve the integrity of the Sacramento River Flood Control Project's levee system. The integrity of various sections of the Sacramento River and tributary levees have become seriously eroded.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	Flood Control Act of 1960 (P.L. 86-645)
Sacramento River, Glenn-Colusa Irrigation District	\$2,000,000	The GCID Fish Screen Improvement Project preserves the agricultural irrigation supplies to roughly 1,200 farm families, while complying with the federal Endangered Species Act and contributing to the restoration of anadromous fish species in the Sacramento River. The project's facilities were completed under a joint USBR-USACE effort pursuant to the authorization provided in the Central Valley Project Improvement Act (CVPIA). Recently, design deficiencies in the pumping plant's "Gradient Facility" have been identified. This request would enable the Corps of Engineers to correct these deficiencies.	U.S. Army Corps of Engineers - Sacramento District 1325 J Street, Sacramento CA 95814	P.L. 102-575, Sec. 3406 B(21)
Red Bluff Diversion Dam Fish Passage Improvement Project	\$109,000,000	Federal and state regulatory agencies have determined that the operation of the CVP's Red Bluff Diversion Dam impedes the safe passage of federally-listed anadromous fish species. A \$109 million appropriation would enable USBR for construction of a new fish screen and pumping plant at Red Bluff to mitigate the project's impact on endangered fish while continuing to serve USBR's Tehama-Colusa canal and Corning canal irrigation customers.	U.S. Bureau of Reclamation - Mid Pacific Region 2800 Cottage Way, Sacramento, CA 95825	P.L. 102-575 Sec. 3406(b)(10)
Sacramento Valley Integrated Regional Water Management Plan	\$4,000,000	The Sacramento Valley Integrated Regional Water Management Plan has a goal of developing a region wide cooperative approach to increasing water supplies and providing for the environmental needs of the Sacramento Valley and those of California. Preliminary studies conducted by the California Department of Water Resources suggest Sacramento Valley's groundwater formations could offer substantial potential water supply benefits to this region. Federal funding is needed to be coupled with state and local investments to seek a better understanding of the process for groundwater recharge and production from the main aquifer system in the area. This initiative will benefit CVP contractors and others by protecting the safe-yield and integrity of the Sacramento Valley's aquifer systems, while at the same time exploring ways to enhance the yield of the Central Valley Project through conjunctive water management.	U.S. Bureau of Reclamation - Mid Pacific Region 2800 Cottage Way, Sacramento, CA 95825	P.L. 102-575 Sec. 3406
Sacramento River Fish Screen Project	\$25,950,000	Section 3406 (b)(21) of the Central Valley Project Improvement Act (P.L. 102-575) requires the Bureau of Reclamation to work with state and local partners to protect federally protected aquatic species through the screening of major water diversions throughout the CVP system. The Meridian Farms Water Company, Natomas Mutual Water Company, and Reclamation District 2035 in Northern California are each working to consolidate and screen major water diversion facilities on the Sacramento River in order to preserve reliable water supplies for agriculture and managed wetlands and remain in compliance with the federal Endangered Species Act. An FY 2010 appropriation of \$25,950,000 million for this program would help complete these important projects.	U.S. Bureau of Reclamation - Mid Pacific Region 2800 Cottage Way, Sacramento, CA 95825	P.L. 102-575 Sec. 3406(b)(21)

Sacramento River Small Diversion Fish Screen Program	\$2,000,000	The Sacramento River Small Diversion Fish Screen Program is designed to facilitate the screening of small water diversions (fewer than 100 cubic feet per second) throughout the Sacramento Valley. Section 103(d)(6)(iii) of the Water Supply, Reliability, and Environmental Improvement Act (P.L. 108-361) authorizes the Secretary to participate in fish screen and fish passage improvement projects as part of the larger Ecosystem Restoration program established under the CALFED program. An FY 2010 appropriation of \$2,000,000 would be used in coordination with state and local matching funds to finance costs associated with the permitting and installation of selected facilities.	U.S. Bureau of Reclamation - Mid Pacific Region 2800 Cottage Way, Sacramento, CA 95825	P.L. 108-361, Section 103(d)(6)(iii)
South Fork Willow Creek Detention Basin	\$11,300,000	The requested funds would be used to initiate construction of a flood control detention basin on South Fork Willow Creek in Glenn County. The purpose of the facility is to capture periodic flood water in the upper Colusa Basin before it can cause damage downstream, particularly to homes and infrastructure in and around the City of Willows.	U.S. Bureau of Reclamation - Mid Pacific Region 2800 Cottage Way, Sacramento, CA 95826	PL 106-566, Title VI
Forest Highway 171 Widening, Butte County, CA	\$5,000,000	This project upgrades a 9.6 mile section of roadway that crosses federal lands between communities of Inskip and Butte Meadows from a one-lane gravel road to a paved two-lane route. These improvements are necessary to provide an emergency evacuation route for Upper Ridge residents who are surrounded by federal forest lands that have not been properly managed to mitigate the threat of catastrophic wildfire. The need for this project is greater than ever considering the Humboldt Fire and Butte Lightning Complex Fires that swept through the ridge and surrounding areas last summer destroying homes and forcing thousands of people to evacuate the area. The project will also increase the chances for effective efforts to control instances of wildfire by cutting in half the response time for fire backup support services. The total project cost is approximately \$21,000,000. The county is using its State Transportation Improvement Program (STIP) dollars (approximately \$2,665,000) for the project. It has received a \$5,000,000 grant from the Federal Highway Administration's Federal Lands Highway Program, \$5,800,000 in SAFETEA-LU, \$980,000 and \$998,450 in the FY08 and F	Butte County Association of Governments 2580 Sierra Sunrise Terrace, Suite 100 Chico, CA 95928	
Wheatland School District, Yuba County, CA	Language Request	The Wheatland School District, which serves Beale Air Force Base, has historically received sufficient federal funding under Impact Aid section 8003. However, changes on base due to the housing privatization have decreased federal funding under 8003 by over two million dollars annually. So the District applied for funding under section 8002 based on over 25,000 non taxable acres due to federal government ownership. A large part of their application included land that the federal government transferred to the state in the 1960's to be used as the Spencerville Wildlife Refuge. The restrictions placed on the property by the federal government prohibit the state from collecting property taxes. Section 8002 of Impact Aid is intended to compensate school districts for property that is tax exempt because of direct or indirect federal government ownership. However, the Department of Education has deemed forty-five percent of their application ineligible. The federal government is no longer meeting its financial obligation to this federally impacted school district, and the situation must be remedied by requiring the Department to treat the Spencerville land as eligible federal property fo	Wheatland School District 111 Main Street, Wheatland, CA 95692
